SUBJECT: Qualification results for testing against MIL-DTL-85891C

1. The Air Force Corrosion Prevention and Control Office has the responsibility for maintaining the list of qualified suppliers of media conforming to MIL-DTL-85891C.

2. The following media was submitted for qualification to MIL-DTL-85891C:

Manufacturer	Solidstrip
Media Type	III
Media Designation	20/30
Batch/Lot Number	M5217
Specification	MIL-DTL-85891C
Test Completion Date	22-Jun-2026
Report Number	25008-EMB-33
Result	Qualified

1. The Air Force Life Cycle Management Center/Product Support Engineering Division (AFLCMC/EZP) has contracted with the University of Dayton Research Institute (UDRI) to update MIL-PRF-85891 to Revision C, *Engineered Media for Organic Coating Removal* and test products for qualification to the specification. The contract covers one round of testing for all vendors that submitted samples of any Type per MIL-DTL-85891.

2. Known vendors/sources of supply were contacted directly via email for their sample and a public notification was issued on the System for Award Management (SAM) under notification ID RSO-ID-2025-01. For any products that did not pass all tests, the vendor will be required to submit samples for retest at their own cost either to UDRI or another laboratory qualified to ISO 17025 for the tests required in MIL-DTL-85891. Because of the synergistic nature of tests in MIL-DTL-85891 and overlapping properties, all tests will need to be repeated, not just failed tests in the original testing. This letter serves as notification of your test result while the qualified products list (QPL) is established at quicksearch.dla.mil [quicksearch.dla.mil]. Qualification will be managed per SD-6, *Provisions Governing Qualification*. All requirements for achieving and maintaining qualification are contained within SD-6.
